### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art does not teach all of the limitations of the claimed invention including:

- (d) forming a groove having a plurality of turns in the inorganic insulating layer, the groove being disposed around the second lifting layer and the front portion of the groove being disposed between the first lifting layer and the second lifting layer;
- (e) forming a coil layer, having a plurality of turns and having a thickness larger than the depth of the groove, in the groove and the over the groove by continuous plating;
- (f) insulating each area between the turns of the coil layer with an insulating material; and
- (g) forming a gap layer comprising a nonmagnetic material, and a top core layer comprising a magnetic material, the top core layer being connected to the second lifting layer and facing the first lifting layer with the gap layer provided there between.

The closest Prior art reference to the above feature is directed to Sasaki (US 6,195,872).

Art Unit: 3729

Sasaki teaches forming a coil layer stack including first magnetic layer and low shield layer. However, nowhere forming a groove having a plurality of turns in the inorganic insulating layer, the groove being disposed around the second lifting layer and the front portion of the groove being disposed between the first lifting layer and the second lifting layer.

Accordingly, claims 1-7 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
